Claims 1, 5-9, 11 and 17-20 are allowed.

The following is an examiner's statement of reasons for allowance: Applicant argues in the response of March 19, 2006 that the new language, "at least substantially rigid shutter member made from or as a solid body" is supported by the original disclosure. It is agreed that these limitations are supported by the original disclosure. On page 20, lines 12-14, of the original specification, applicant discloses that the shutter is capable of a "very small amount of flexing", this teaching in view of the structure shown in the drawings would teach one of ordinary skill in the art that the shutter is substantially rigid. With respect to the double patenting rejections in view of copending application 10/623,528, applicant has amended the claims in both applications such that they are now patentably distinct.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
